The Karner Blue Needs You!

Many years ago there were so many Karner Blue butterflies in New York that they were described as clouds of blue. Sadly, today this beautiful blue butterfly is on the endangered species list. If New York was to make the Karner Blue its State Butterfly, awareness, excitement and a sense of pride about this butterfly could help save it from extinction. You can help bring back the Karner Blue by signing this petition to make it New York's State Butterfly. The Karner Kids thank you!
